Subject: Notification: Revised Container Disposal Instructions per PR Notice 2007-4:

Albaugh Technical Glyphosate Acid

EPA Reg. No. 42750-56

Your Application Dated June 7, 2011

Dear Mr. Gaskins:

The Agency is in receipt of your Application for Pesticide Notification under Pesticide Registration Notice (PRN) 2007-4 for the subject product.

The Registration Division (RD) has conducted a review of this request for applicability under PRN 2007-4 and finds that the label changes requested fall within the scope of PRN-2007-4. The label has been date-stamped "Notification" and will be placed in our records.

Please be reminded that 40 CFR Part 156.140(a)(4) requires that a batch code, lot number, or other code identifying the batch of the pesticide distributed and sold be placed on nonrefillable containers. The code may appear either on the label (and can be added by non-notification/PR Notice 98-10) or durably marked on the container itself.

If you have any questions, please call me directly at (703) 306-0415 or Susan Stanton of my staff at (703) 305-5218.

Sincerely,

Kable Bo Davis, Product Manager 25

RE: PR Notice 2007-4 Container Disposal

Dear Mr. Davis,

The enclosed submissions for the below referenced registrations are label notifications in response to the Agency's PR Notice 2007-4 for Container Disposal revision.

PRODUCT	EPA REG. NO.
Triclopyr Acid II	42750-191
Triclopyr Acid III	42750-197

Glyphosate Acid Technical	42750-56
Glyphosate Acid TGAI	42750-170
Glyphosate Acid TGAI	46146-6
Trifluralin Technical	46146-2

Please note that the Container Disposal statements for the clopyralid and triclopyr products are the same as ones previously approved by EPA for similar Albaugh registrations. We are using the same language for the glyphosate technicals because they are received in the same plastic lined bulk tote bags. The trifluralin product has similar packaging (un-lined open mouth metal drum) as our previously approved Bromoxynil Technical.

Three copies of the draft label with changes noted with strikeout/bold text are enclosed. The PRN certification statement is listed on the 8570-1 forms.

Please call if you have any questions.

Dear Mr. Gaskins:

Subject: EPA Reg. 42750-56 / Glyphosate Technical Alternate CSF Chemistry Deficiencies

The Agency has received and initially reviewed the subject application and has determined that it is incomplete or that further information is needed. This letter is a written notification of those deficiencies and identifies your options under 40 CFR 152.105 and Section 33 of the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), as amended by the Pesticide Registration Improvement Act (PRIA). Your options under 40 CFR 152.105 and section 33 of FIFRA are addressed separately because each involves a different timeframe and set of options for responding to this letter. Please ensure that you consider each of the sections below in determining how and when you respond to this letter.

40 CFR 152.105:

Pursuant to 40 CFR 152.105, you are allowed 75 days from the date of this letter to provide a response concerning the deficiencies listed in this letter. Your response may include making corrections or additions to complete the application, or notifying the Agency of the date on which you expect to complete the application, or withdrawing your application. If you do not respond to this letter within 75 days or if you respond with a date on which you expect to complete the application but fail to meet that scheduled date, the Agency will treat the application as if you had withdrawn it. Withdrawal concludes the Agency's review of your application. Any subsequent submission of the same application must then be submitted as a new application with a new deadline for responding and subject to a new registration service fee. The deficiencies identified in the Agency's review at this time are as follows:

SUMMARY OF FINDINGS:

1. Applicant is stating the product for the new source will have a concentration of 96.5% of the active ingredient Glyphosate Technical.

- 2. Applicant is seeking approval for the product that will be manufactured in China.
- Applicant has submitted MRID#s 476361-01 for Product Chemistry data to support new source of Technical Glyphosate.
- 4. Preliminary analysis of average recovery of Technical Glyphosate ranged from 94.36%-95.76% Mean average 95.23%.
- The aforementioned MRID# States Analytical method and Preliminary Analysis of Glyphosate and formation of impurities that will be discussed in the following pages.
- 5. Since the new source of Glyphosate Technical will be manufactured in China following additional is required:
- a. Description of the new manufacturing process, in China.
- b. Applicant needs to address any impurities of toxicological concern after using the new source of starting material for manufacturing Glyphosate Technical.
- 6. Data corresponding Sub Group A do not satisfy the data requirements of 40CFR§158.320 to §158.355. Applicant needs to provide entire Product Specific Product Chemistry Data for the Sub Group A (830.1620, 830.1670 & 830.1600) for the proposed New source for the Product.
- 7. TRB cannot accept the aforementioned request by ALBAUGH INC.

CONLUSIONS:

TRB has reviewed the product chemistry data submitted for the above mentioned subject product and has concluded that:

- Product Chemistry data requirements for subgroup A are not satisfied and do not fulfill the requirement of OPP test guidelines.
- TRB cannot accept the aforementioned request by ALBAUGH INC. on account of the reasons listed #5-7 in summary of findings.

Further review of your application and your response to the deficiencies may identify additional deficiencies and you will be so informed.

FIFRA Section 33/PRIA:

This application is also subject to a deadline for making a determination on the application under FIFRA Section 33, Pesticide Registration Service Fees, established under PRIA. The time frame for the Agency to make a determination on this application ends on May 23, 2009. You have the

following three options:

- Establish a new due date. You may work with us to establish a new section 33/PRIA deadline that allows for an appropriate response to the 75 day letter. If you choose this option, you need to contact the Agency not later than May 15, 2009 to discuss a time frame that allows you to address the deficiencies listed above and the Agency to make a regulatory decision.
- 2. Withdraw the application. Alternatively, you may notify us not later than May 15, 2009 that you are withdrawing your application. As noted above, withdrawal concludes the Agency's review of your application; however, you may resubmit your application after the deficiencies have been addressed. Should you choose to resubmit your application, it would be subject to a new deadline for responding to the application and a new registration service fee. Since a fee was paid with this application, the Agency will provide any applicable refund as soon as practicable.
- 3. Not respond. If the Agency does not hear from you by May 15, 2009, the Agency in meeting its obligations under section 33/PRIA may issue a determination to not grant your application. While a determination to not grant an application would allow EPA to have met its obligation under section 33 of FIFRA to issue a determination by a specified date, this determination is neither a denial of the application pursuant to section 3(c)(6) of FIFRA or a withdrawal of the application. Thus, the Agency will continue to diligently work on any such application as long as EPA receives a response to the/a deficiency within the 75 days described above.

Please respond to this letter by May 15, 2009 by contacting Erik Kraft at 703-308-9358 or email at Kraft.Erik@epa.gov with a response and for any questions concerning this letter.

Sincerely,

Jim Tompkins

Footnotes

A. This consideration does not apply to PRIA applications that include a request to approve an inert in the fee category. For these PRIA actions, information needs to be submitted to enable the Agency to review the inert approval request and will be a subject of the 21 day content screen. For other types of actions and for fragrances, the answer is only for the Agency's information and current policies, processes, and procedures should be consulted. This worksheet will be updated in the future to be consistent with current policies.

If brand, trade, or proprietary names are being used for some inert ingredients listed on the CSF, alternate names or additional information on the nature of the ingredient(s) should be provided to allow the Agency to determine whether the inert has been approved.

- B. A policy on documentation of offers to pay is still being developed, however, for a me-too or fast track (similar/identical) new product, R300 or A530, an application without the necessary authorizations of offers to pay will be placed into either R301 or A531. The Agency recommends that authorizations of offers to pay be submitted with other PRIA applications to avoid delays in the Agency's decision.
- C. Refer to the list of data requirements. Biopesticide applicants were advised to contact the Agency and discuss study waivers prior to submitting their application to the Agency. Documentation of such discussions should be submitted with the study waiver.
